ELSEVIER

Int. J. Production Economics 50 (1997) 279–280

international journal of
production
economics

Contents Volume 50

Vol. 50, No. 1

Yield comparison of push and pull control methods on production systems with unreliable machines
J. Ou and J. Jiang 1
Using "look ahead" techniques in job-shop scheduling with random operations
D. Golenko-Ginzburg and A. Gonik 13
Identifying investment opportunities for advanced manufacturing systems with comparative-integrated performance measurement
G. Kim, C.S. Park and K.P. Yoon 23
Optimal inventory policies for perishable items with time-dependent demand
M. Hariga 35
Business process re-engineering: New applications for the techniques of production engineering
R. MacIntosh 43
Product ranking, budget allocation and monopolistic pricing in a multiproduct firm: An application at Nonius, a division of Delft Instruments
H. van Maaren, J.B. Molenkamp and H.J. Reus 51
Observation on: The economic lot scheduling problem: Theory and practice
S.K. Goyal 61
Diary of Events 63

Vol. 50, Nos. 2, 3

Editorial: Business process reengineering: Modelling and analysis
A. Gunasekaran and T. Ichimura 65
An example of the application of production system design tools for the implementation of business process reengineering
T.M. Jones, J.S. Noble and T.J. Crowe 69
Evaluating product and process design changes with warranty data
K.D. Majeske, T. Lynch-Caris and G. Herrin 79
The role of information technology in business process reengineering
A. Gunasekaran and B. Nath 91
Reengineering the production planning process in the food industry
E. Houghton and V. Portougal 105
The effect of task and information asymmetry on business process redesign
A. Seidmann and A. Sundararajan 117
Formal business process engineering based on graph grammars
C. Klauck and H.-J. Müller 129
A strategic alignment approach for effective business process reengineering: linking strategy, processes and customers for competitive advantage
A. Lockamy III and W.I. Smith 141
Market share and warranty costs for renewable warranty programs
A. Mitra and J.G. Patankar 155
